Company Name	Bridgei2i Analytics Solutions
Website	https://bridgei2i.com
Job Profile	Software Engineer
Package	5.5 LPA
Mode of Application	On Campus
Mode of Hiring	Physical Presence
Total Round	4
Difficulty Level	3

ROUND-1

Mode of Examination : Online Test.

Online exam conducted on mettl.

it mainly focused on Logical reasoning, Data interpretation and Algorithms. Overall difficulty level was Easy.

ROUND-2

Mode of Examination: Conducted in physical presence.

it was a group discussion in which we were given a case study. Case study was a business problem in which we had to come up with solutions to the problems faced by the company personals. We were given 15-20 mins to understand the problem and come up with the answers on our own to the questions asked at the end of case study. After that answers were discussed among the group to arrive at the final solution.

Overall difficulty level: depends on the case study and your problem solving skills.

ROUND-3

Technical Round

Mode of Examination: Conducted in physical presence.

Third round was technical one. Few questions on SQL were asked. In addition to this Data structures knowledge was tested. Puzzle was given to be solved. Overall difficulty level: Medium.

ROUND-4

Technical Round

Mode of Examination: Conducted in physical presence.

Fourth round was again technical but mainly focused on the projects I did. Most of the questions asked were "Why & What" type. All you need to clear this round is to have clear understanding of the projects you did. There was no separate HR round because of time constraint. HR was observing me while I was being interviewed.
Overall difficulty level: Medium

Our Question

How was your preparation?

If I have to give a score to my preparation, I would give 7/10.

How and what resource you used for the preparation?

Geeksforgeeks and Leetcode.

How much you were prepared for the interview?

I would say that I was confident enough to answer the questions asked by the interviewer.

What kind of student you have been academically ?

I'm not a geek so yeah I performed average in my academics.

Were you part of some extra activities ?

Nope except someone who plays good Volleyball can call me in anytime.

Our Question

What was the key subject or point that this interview was more about?

This interview was all about logical thinking. It's okay if you aren't too good at s specific technology. They expect you to come up with some solution to the questions they ask. Last but not the least focus more on your projects. This will play a huge role in the selection process.

What is your advice to your juniors?

I'm not the right person to give advice but still I would say Have patience and keep doing what you wanna do, you will succeed sooner or later.
